

# Bumble Bee

Wireless Earbuds

Model No.: iG-1142

## **Charging The Base**

With the included USB/micro-USB cable: insert the micro-USB end into port 'A' of the charging case, and the USB end into a PC or travel charger port. The blue LEDs inside the case (B) will illuminate in sequence to indicate progress of charging.

## **Charging the ear buds**

Place both earbuds in the charging case: the LEDs will illuminate fixed red to indicate that charging is in progress. When charging is complete they will temporarily turn blue and then turn off.

## **Activation and pairing**

Make sure you have turned off Bluetooth on your smartphone. Hold down the MFB button (the only button on the earbuds) for a few seconds, until both LEDs flash red and blue alternately. Wait a few seconds until the ear buds recognize and pair with each other (this will be confirmed by the voice message: 'connected'). Only at this point, activate Bluetooth on your smartphone. As soon as the pair of earbuds is recognized, select (iGear-BumbleBee) from the list: the LEDs will turn off to confirm successful pairing. If only one earbud has been paired by mistake, unpair it and repeat the procedure from scratch. After the first connection, the earbuds will automatically pair on removing them from the charging case.

## **Power off**

Press and hold the MFB buttons until the LED flashes red once to indicate power off or insert the earbuds into the charging case and close it.

## Functions summary

**Answering a call:** Press MFB once quickly

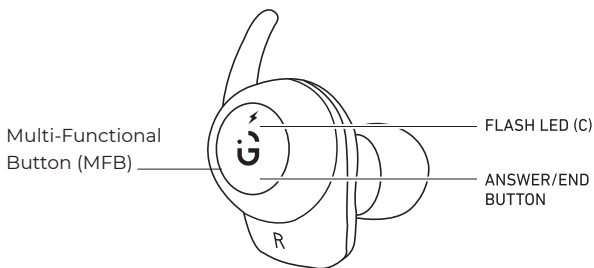

**Ending a call:** Press MFB once quickly

**Rejecting a call:** Press and hold MFB for about two seconds
